

# 4<sup>CRITICAL</sup> SOCIAL SECURITY

FACTS RETIREES MUST KNOW

More than 69 million Americans (21% of the U.S. population) receive some form of Social Security.<sup>1,2</sup> The public insurance has helped lay the economic foundation for Americans for more than 80 years, providing help to retirees and others.<sup>3</sup>

Since the nation's founding, its leaders have struggled with finding humane and sound economic approaches to helping the elderly, widows and orphans, and the less fortunate. It wasn't until President Roosevelt signed the Social Security Act into law on August 14, 1935, that Americans witnessed a turning point in the government's role in providing help for its aging population.<sup>4</sup>

Developed on the cusp of the Great Depression (1929–1935), the act promised relief to millions of elderly and retired Americans. Social Security provided benefits for retirement, aid to dependent children, and insurance for the disabled or the unemployed.<sup>5</sup>

Today, Social Security benefits represent on average a third of retirees' income. Nearly 90% of Americans 65 and older receive some type of Social Security benefits. About half of married couples and 70% of unmarried people on Social Security rely on the benefits for at least 50% of their incomes. Twenty-one percent of married couples and about 45% of unmarried people rely on Social Security for at least 90% of their income.<sup>6</sup>

The Bipartisan Budget Act of 2015 closed two complex filing loopholes available to married couples. The loopholes allowed some married people to begin receiving spousal benefits at their full retirement age, while their own Social Security benefits continued to grow by delaying filing for it.<sup>7</sup>

The law requires applicants to file for both benefits. Called “deemed filing,” the revisions are extended to those who have at least reached their full retirement age. Deemed filing means you were “deemed” to file for both benefits.

### HERE ARE FOUR IMPORTANT CHANGES TO SOCIAL SECURITY IMPLEMENTED IN 2021:<sup>8</sup>

1. Social Security recipients received a 1.3% increase in payments in 2021. The Social Security Administration

(SSA) attempts to match benefits to inflation.

2. The maximum taxable earnings limit rose to \$142,800 (from \$137,700 in 2020). Earnings above that limit are not taxed. Workers' Social Security tax remains at 6.2%.
3. The full retirement age continues to rise. It is scheduled to increase by two months each year until 2022, when it reaches 67.
4. Earning limits are expected to increase. Social Security recipients who work will find their benefits temporarily reduced.

We'll discuss many of these items in greater detail later in this report.

The SSA makes annual changes to the program.

**Here are some important facts:**

### YOUR BENEFIT AMOUNT DEPENDS ON YOUR RETIREMENT AGE.

Your benefit amount varies depending on when you apply for benefits. You may file to claim benefits before your full retirement age. The earliest you can claim is at 62; and you will not receive any additional benefits delaying past the age of 70. If you claim prior to reaching your full retirement age, the SSA reduces your benefit amount by a percentage for each month prior to your full retirement age. For example, if you were born in 1960 and retire at 62 (2022), you'll get 70% of your monthly benefits. If you retire at 65, you'll get 86.7%.<sup>9</sup>

Full retirement age varies. The full retirement age is 66 years and 2 months for those born in 1955. The age gradually increases to 67 for people born in 1960 and later. If retirees take benefits prior to their full retirement age, their benefits will be permanently reduced. The full retirement age is when recipients will be able to receive their full benefits (or 100% of their calculated benefits).<sup>10</sup>

Following legislative changes in 1983, the full retirement age, which was 65, began rising by two months starting for people born in 1938. However, benefits will increase

by 8% per year for those who decide to delay collecting Social Security beyond their full retirement age. Recipients who wait until they're 70 to collect benefits will receive 24% higher payments.<sup>11,12</sup>

Both choices (retiring early at 62 or delaying until the age of 70) have advantages and disadvantages.<sup>13</sup>

The SSA calculates individual benefits so that recipients receive approximately the same total amount over the course of their retirement.<sup>14</sup>

## **YOU MAY WORK AND COLLECT SOCIAL SECURITY BENEFITS.**

The SSA acquires information from you, such as bank account and routing numbers, during the initial application process. You're required to provide the SSA with outside earning estimates for the upcoming year.

The SSA obtains your outside earnings from the W-2 forms your employer files or your self-employment income on tax returns to verify your income and gauge your benefit amounts. Social Security benefits are based on the projected income levels you report at the beginning of the year. The SSA will inform you if your benefits will have to be adjusted based on outside earnings. The SSA sets outside earning limits for recipients who receive benefits. When you exceed those limits, the SSA reduces your Social Security benefits. The limit on outside earnings for 2021 is \$18,960.<sup>15</sup>

The SSA deducts \$1 in benefits for every \$2 above the outside income limit if you're working and collecting Social Security prior to your full retirement age. In the year you reach full retirement age, the SSA subtracts \$1 in benefits for every \$3 you earn above \$50,520. However, that deduction only applies in the months of that year prior to the month you reach full retirement age.<sup>16</sup>

In the month you reach your full retirement age, the SSA no longer restricts your outside earnings. This year's \$50,520 outside income limit is an increase from 2020's \$48,600.<sup>17</sup>

## HERE ARE SOME EXAMPLES:

Mr. Jones turns 67 (his full retirement age) in July 2021. Mr. Jones has been making \$45,000 a year from his job. He reported his estimated earnings for 2021 at the beginning of 2021. The SSA will verify his earnings estimates with his W-2 forms at the end of the year.

Mr. Jones has been collecting Social Security benefits since he turned 62. Under the current income limits, the SSA would make deductions from his benefits on \$26,040, the difference between \$45,000 and \$18,960. Since the SSA deducts only \$1 for every \$2 above the outside income limit, the deductions to his Social Security benefits are half of that amount: \$13,020 a year or \$1,085 a month. If the SSA had determined that Mr. Jones would receive \$1,543 per month from Social Security, the national average, his adjusted check would be \$458, the difference between \$1,543 and \$1,085.<sup>18</sup>

Once Mr. Jones reaches the year of his full retirement age (2021), the SSA will no longer make deductions to his benefits in that year (prior to his birthday) because his income will be below the higher outside earnings limit of \$50,520. The upper limit applies to recipients who are earning outside income and who have reached the year of their full retirement.

Mrs. Smith is another story. Her projected annual income for 2021 was \$60,000 within the year she turned 67 (her full retirement year) and before her August birthday. Her income above the higher limit of \$50,520 (\$9,480) reduces her Social Security benefits at the 3-1 rate: a \$1 deduction for every \$3 over that limit. That's \$3,160 of annual benefit reduction, or \$263.33 of benefit reduction a month. If the SSA had determined that Mrs. Smith would receive \$1,543 per month from Social Security, her adjusted check would be \$1,279.67, the difference between \$1,543 and \$263.33.<sup>19</sup>

In August, the month she turns 67 and afterward, the SSA no longer reduces her benefits. She no longer has income limits.

If Mrs. Smith had claimed Social Security benefits at 62 and had been making \$60,000 a year in outside income, her benefit amount would have been reduced under the lower limit: \$18,960. The difference is \$41,040. The SSA would have deducted half of that from her checks: \$20,520 a year or \$1,710 a month. If her Social Security payments had been calculated at \$1,543 a month, for example, she would have been receiving \$163 a month in benefits prior to her reaching the year of her full retirement age.

Both Mr. Smith and Mrs. Jones are hypothetical examples used for illustrative purposes only. They do not show or represent any specific Social Security strategy or any specific Social Security payments.

## HERE'S WHY YOU SHOULD WAIT:<sup>20</sup>

- You plan on working, and you expect to earn more than the Social Security's \$18,960 income limit.
- You have little savings; you're single and healthy. Waiting to collect benefits will increase payments.
- Your spouse is working. The higher combined income means a larger portion of your Social Security benefits may be taxed. By waiting to collect Social Security, you'll be able to keep more of your benefits.
- You expect to have a long life. The average life expectancy of an American reaching 65 today is about 87 for women and 84 for men.<sup>21</sup>
- Your spouse's benefit is smaller or your spouse is considerably younger. Your combined life expectancy is longer.

---

# SOCIAL SECURITY IS A MAJOR SOURCE OF INCOME FOR MOST RETIREES.<sup>6</sup>

---

## HERE'S WHY YOU SHOULD NOT WAIT:<sup>22</sup>

- You don't expect to earn income above the annual \$18,960 limit for 2021.
- You have health problems or have below-average life expectancy.
- Your spouse's benefit is larger than yours.
- You lack other income sources and have no opportunity to earn money.
- Although Social Security checks will be smaller, you will have collected 8 more years of checks (96 months) than if you had waited until you had reached 70.
- About 31% of women and 27% of men start collecting benefits at age 62.<sup>23</sup>

---

# SOCIAL SECURITY BENEFITS REPRESENT ON AVERAGE A THIRD OF RETIREES' INCOME.<sup>5</sup>

---

## YOUR SOCIAL SECURITY BENEFITS ARE SUBJECT TO INCOME TAXES.

You may still have to pay taxes on your Social Security benefits. However, taxes are capped at 85% of benefits.<sup>24</sup>

The SSA requires recipients to pay taxes if they file returns as individuals and their combined income is more than \$25,000. Joint filers (who are married) are required to pay taxes if their combined income is more than \$32,000. Married Social Security recipients who file separate returns may still have to pay taxes on their benefits.<sup>25</sup>

If you file a return as an individual, and your combined income is \$25,000-\$34,000, you may have to pay income tax on up to 50% of your Social Security benefits. You calculate your combined income by adding together your adjusted gross income, nontaxable interest, and half of your Social Security benefits.<sup>26</sup>

Up to 85% of your benefits are taxable if you file as an individual and your combined income exceeds \$34,000.

For joint filers who are married, up to 50% of their benefits are taxed if their combined income is \$32,000-\$44,000 or 85% of their benefits if their combined income is more than \$44,000.

## MARRIED COUPLES GET SPOUSAL AND SURVIVOR BENEFITS.

Social Security benefits for married couples work differently. Here are five important facts:<sup>27,28,29</sup>

1. Your current marital status doesn't affect your eligibility for Social Security benefits. If you've worked at least 10 years and earned at least 40 work credits, you can get benefits.
2. The SSA doesn't penalize married couples or restrict benefits. Spouses receive benefits based on their own work histories.

3. If you're eligible to receive one of two benefits, you receive the higher one. Lower-paid spouses are eligible for benefits either on their own work histories or the spousal benefit on their partner's record. Lower-paid spouses are eligible to receive up to half of the benefits of their partners.
4. Divorced spouses who were married at least 10 years are eligible for higher benefits based on the records of their partners. Divorce decrees relinquishing rights to partners' benefits are not binding.
5. Widowed Social Security recipients are eligible for widow benefits. Widows may get 71.5% (at age 60) and 100% of their spouses' when the widows reach full retirement age.

## HOW IS YOUR SOCIAL SECURITY CALCULATED?<sup>30</sup>

The SSA calculates your benefits based on your lifetime earnings. If you're not retired and haven't set up a Social Security account, you may go to [www.socialsecurity.gov/estimator](http://www.socialsecurity.gov/estimator) to learn more about your projected benefits. You may also set up an account at [www.socialsecurity.gov/myaccount](http://www.socialsecurity.gov/myaccount).

The SSA calculates your Social Security benefits by indexing your average monthly earnings during the 35 years you earned the most. The administration generates your basic benefit, or "primary insurance amount," which is what you will receive at your full retirement age. The average monthly benefit is \$1,543.<sup>31</sup>

You may contact the SSA at 800-772-1213. The SSA's TTY number for the deaf or hard of hearing is 800-325-0778.

You may speak to a Social Security representative by calling those numbers from 8:00 a.m.–7:00 p.m., Monday–Friday.

## CONCLUSION

We hope you found this report educational and informative. We also hope that some of the principles and statistics outlined in the report may help you make the most out of your SS benefits.

Developing a strategy with an understanding of how to optimize your Social Security may put you in a better position when you start to draw your benefits.

Working with a financial professional may help equip you to find the solutions that are designed to fit your retirement lifestyle.

We can help you analyze your financial situation to develop a strategy for pursuing your retirement vision.

If you or anyone close to you would like to discuss how to maximize your Social Security benefits with a professional, please give our office a call to schedule a complimentary consultation at .

Warm Regards,
